

# REDUCTION OF DUST PARTICLES

IN AN OFFICE

## Field test location:

An office in Singapore.

## Conducted by:

Medklinn

## Test method:

Tested in an office (1408 cubic feet) by using TSI 9306 Handheld Particle Counter to measure the total particle counts @ 28 deg C for 24 hours.

## Test results:

The Medklinn Air+Surface Sterilizer was very effective at bringing down particle count at ambient condition to approximately 46% reduction.
